

The Almost Untreatable Narcissistic Patient

**Svenska TFP föreningen inbjuder till föredrag med
Otto Kernberg**

It is a great pleasure to invite you to listen to a lecture on Narcissism with Otto Kernberg, MD, Professor of Psychiatry at Weill Medical College of Cornell University, New York. Dr. Kernberg is Past-President of the International Psychoanalytic Association. He is training and supervising Analyst of the Columbia University Center for psychoanalytic Training and Research. Dr. Kernberg has developed Transference Focused Psychotherapy (TFP) which is an empirically-validated treatment for personality disorder. The major theoretical work on Borderline Personality Disorder and TFP origins from Otto Kernberg. Modern concepts of Borderline Personality Disorder go back to his work on “Borderline Conditions and Pathological Narcissism” (1975) and “Severe Personality Disorders” (1984). Until today these books have shaped the diagnostic criteria for BPD in psychiatry and its classification systems ICD-10 and DSM-5. In his recent work, Kernberg kept refining his concepts and applying it to different clinical conditions related to BPD, e.g., narcissistic personality disorder (Kernberg 1992, 2007, 2008, 2011).

FREDAG 4 APRIL 2014

kl. 19.30 – 21.00

ABF-huset, Sveavägen 41, Sandlersalen, Stockholm

Varmt välkommen!

Sophie Steijer MD

Stephan Hau, PhD, Professor
